## **COMMENTS**

### ***Reasons For Allowance***

The following is an examiner's statement of reasons for allowance: the independent claims define a method and apparatus for lacing together portions of an inflatable evacuation slide comprising two panels, each having a plurality of apertures. Providing a single length of cord having a first end and a second end. Attaching an end of the cord to a panel and lacing the cord through the apertures in the superimposed panels for forming a plurality of loops and then passing the loops through adjacent loops and securing the last loop to one of the first and second panels. The dependent claims further limit the method and apparatus of the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Pertinent Citations***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kuhn illustrates a sewing machine for forming a single thread chain stitch. Fisher illustrates an evacuation ramp including a daisy chain of loops with a pull strap and pin passing through the "master" loop. Larkworthy et al. Illustrates an aircraft escape pack including a zig-zag lacing on the packaging. Horvath et al. Illustrate an evacuation ramp including speed lacing having a plurality of loops, each attached to a panel passable through apertures and inter-looped with each other and to a release mechanism.
